

## Better Returns from improving worm control and reducing mastitis incidences

Tuesday 8<sup>th</sup> May 2012 12.30 – 4.30pm

**Darley Stud Management Ltd, Dalham Hall Stud, Duchess Drive,  
Newmarket, CB8 9HE**

*By kind permission of Darley Stud Management Ltd*

At this final focus farm meeting join ADAS and EBLEX at Darley to learn about improving worm control and reducing the incidence of mastitis. Kate Phillips and Dan Phipps, manager of the 1000 ewe flock, will give an update on flock performance. Professor Laura Green, University of Warwick, will share recent findings on mastitis. The farm's vet Aimee Hamilton will cover local health issues and give a practical FEC demonstration with second shepherd Andy Armer.

- 12.30pm** Arrival, registration and lunch
- 1.30pm** Introduction and update on lambing performance – including lambs reared, lamb losses, feeding issues, mastitis cases and treatment - *Kate Phillips, ADAS and Dan Phipps, Darley Stud*
- 2.15pm** Recent research on mastitis – *Prof Laura Green, University of Warwick*
- 3.15pm** Move to farm office for practical demonstration on faecal egg counting and parasite control plans for the season plus a local health update – *Aimee Hamilton (Swayne and Partners) and Andy Armer (second shepherd)*
- 4.30pm** Questions and discussion
